## Discussions

`https://im.laas.fr/#/room/#git-forges:laas.fr`

- 1 Introduction
- 2 Branches
- 3 Forks
- 4 Requests
- 5 CI
- 6 Workflows
- 7 End notes

# Introduction

- Software management
  - git repository (web, HTTPS, SSH)
  - authorizations
  - issue tracker

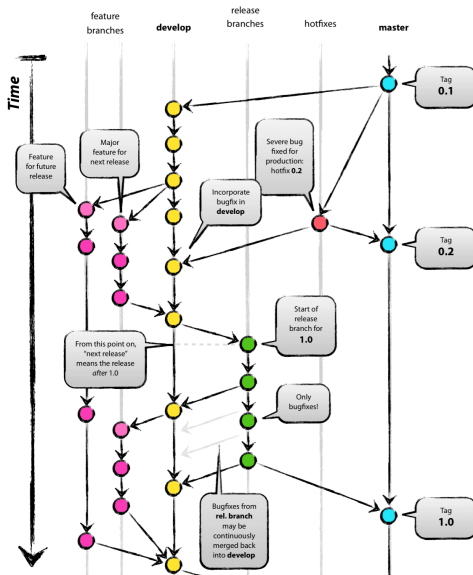

- 1 domain
  - 2 username OR group (organization)
  - 3 project
- `https:// gitlab.laas.fr / gsaurel / talks`
  - `https:// github.com / gepetto / example-adder`

- bug fix / feature request
- Github / Gitlab: #4
- referencable from git:
  - `git commit -m "add test for user input, ref #4"`
  - `git commit -m "sanitize user input, fix #4"`

# Branches

# Goal

## Branches

- default: master or main
- devel, stable
- issue/5
- topic/something

# Forks

- scission (software development)
  - document motivations
  - rename
  - change logo / website etc.
  - ensure compatibility
- collaboration (git forges)
  - try to keep synchronized

- scission (software development)
  - document motivations
  - rename
  - change logo / website etc.
  - ensure compatibility
- **collaboration (git forges)**
  - try to keep synchronized

```
git clone --recursive \  
    git@gitlab.laas.fr:gsaurel/example-adder.git  
cd example-adder  
git remote add gepetto \  
    git@gitlab.laas.fr:gepetto/example-adder.git
```

```
git clone --recursive \  
    git@gitlab.laas.fr:gsaurel/example-adder.git  
cd example-adder  
git remote add gepetto \  
    git@gitlab.laas.fr:gepetto/example-adder.git  
  
git pull gepetto master  
git push origin master
```

```
# ~/.ssh/config
```

```
Host gl
```

```
    HostName gitlab.laas.fr
```

```
    User git
```

```
git clone --recursive gl:gsaurel/example-adder
```

# Requests

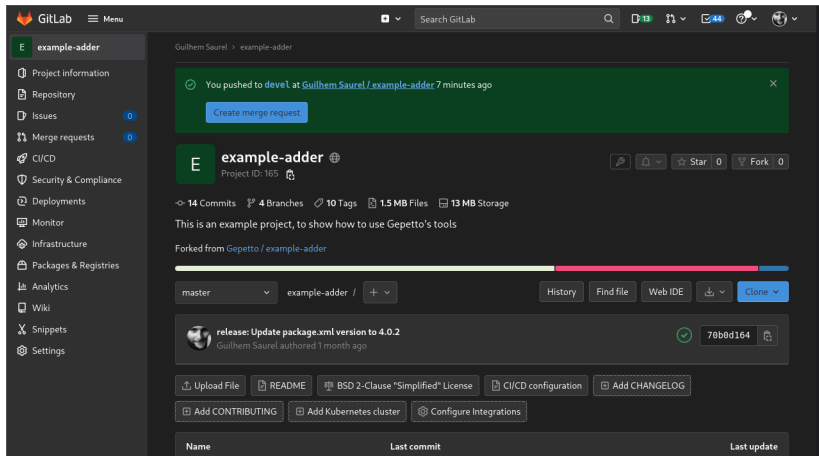

Figure 2: Merge Request

```
git push -o merge_request.create \  
        -o merge_request.target=devel \  
        origin topic/something
```

The screenshot shows a GitHub pull request interface. At the top, the repository is identified as 'nim65s / example-adder' (Public), which is a fork of 'Gepetto/example-adder'. Navigation tabs include Code, Pull requests, Actions, Projects, Wiki, Security, Insights, and Settings. A status bar indicates 'devel had recent pushes 2 minutes ago' with a 'Compare & pull request' button. Below this, it shows 'master' branch, '8 branches', and '10 tags'. A message states 'This branch is up to date with Gepetto:master.' and provides 'Contribute' and 'Fetch upstream' options. The pull request itself is titled 'nim65s release: Update package.xml version to 4.0.2', created by '70b0d16' on '8 Dec 2021' with '14 commits'. A table lists the changes:

File	Description	Time
cmake @ 84f1ae1	[Cmake] Add Submodule	2 months ago
include/example-adder	[Bindings] Add Python bindings	2 months ago
python	[Bindings] Add Python bindings	2 months ago
src	[bin] Add gepetto-example-adder executable	2 months ago
tests	[Tests] Check main executable	2 months ago
.gitlab-ci.yml	[CI] Add gitlab-ci.yml	2 months ago

On the right, the 'About' section describes the project as an example for using Gepetto's tools, listing the 'Readme', 'BSD-2-Clause License', '0 stars', '2 watching', and '4 forks'. The 'Releases' section shows '10 tags' and a 'Create a new release' link. The 'Packages' section is also visible.

Figure 3: Pull Request

Required: <https://cli.github.com/>

```
gh pr create
```

CI

```
# .gitlab-ci.yml
image: gitlab.laas.fr:4567/gsaurel/talks

build:
  script:
    - make

test:
  script:
    - make test
```

```
git config --global alias.mwps "push \
    -o merge_request.create \
    -o merge_request.target=devel \
    -o merge_request.merge_when_pipeline_succeeds \
    -o merge_request.remove_source_branch"

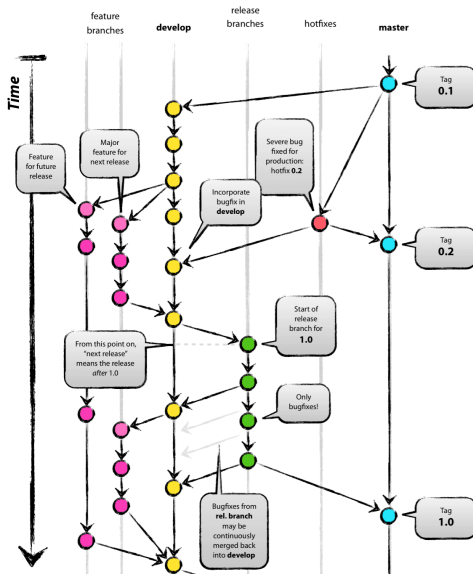

git mwps origin topic/something
```

```
# .github/workflows/build.yml
name: Build
on: [push,pull_request]

jobs:
  build:
    name: Transpile markdown sources into PDF
    runs-on: nim65s/talks
    steps:
      - uses: actions/checkout@v2
      - run: make
```

# Workflows
